

Dear Elena Zhakov,

Congratulations! On behalf of Clark University, I am pleased to inform you that you have been provisionally accepted to the Biochemistry and Molecular Biology (BA/MS) program beginning in Summer 2027. This provisional admission is the first step to securing the 100% tuition scholarship. This merit-based program is highly competitive and selective, so please allow me to offer you our congratulations for this milestone.

Your provisional acceptance is pending your completion of the Biochemistry and Molecular Biology (BA/MS) requirements as stated on the Clark University [4+1 program website](#). However, for your convenience these requirements are listed below:

- 3.4 or higher cumulative GPA at the end of the senior year
- Successful completion of two BCMB 300-level courses
- Submission of research proposal in last semester (deadline to be announced)

Once you successfully complete these requirements, you will be issued a full admission into the program along with the 100% tuition scholarship. If anything related to your academic progression or record changes, your eligibility for this program may change. Final admission is issued only after the completion of your senior year at Clark and a final review of your full academic record.

This admission is provisional in nature, allowing you to take graduate coursework during your final two semesters at Clark. Please keep in close contact with both your graduate program adviser and regular academic advisor throughout your senior year. It is your responsibility to keep them informed of your progress toward the completion of any requirements prior to your enrollment in your graduate program.

While 100% of the tuition for the program is covered by the scholarship, applicable fees, text books, program materials and incidentals are your responsibility. The 4+1 program does have a one-time administrative fee that you will be billed in your first semester as a graduate student. Fees are posted online and are part of the overall cost of the program. Fees are subject to Board of Trustees approval and are set on an annual basis.

Health insurance is required by Massachusetts law for all students, please visit [University Health Plan](#) for more information and to see if you qualify for a Health Insurance Waiver; you are required to show proof of immunizations as well. Please see the [Frequently Asked Questions](#) page for more information.

In the coming months, we will send out a survey to confirm your acceptance into the program. Please be sure to check your Clark email address. It should be sent to you about 4 months before you begin your graduate program.

If you have any further questions, please contact the [Graduate Admissions Office](#). Once again, congratulations on this achievement. I look forward to welcoming you as a graduate student in Summer 2027!

Sincerely,

Lukman Arsalan
Vice President of University Enrollment
