

April 17, 2026

Dear Elena,

On behalf of the Biology Faculty, I am pleased to inform you that your proposal for Clark's Summer Undergraduate Research Experience has been approved for the summer of 2026.

The award will provide a potentially taxable stipend of \$3,500 for ten weeks of research under the direction of your faculty sponsor, Professor Javier Tabima. A minimum of eight weeks is required and the stipend will be pro-rated if you are unable to complete eight weeks of full-time research. If you are the recipient of any other summer stipend award from Clark University, we will reduce the stipend so that you receive not more than \$3,500. In addition to your research, you will be expected to participate in any summer programming, including seminars and/or workshops which will be communicated via email over the summer. Details on the stipend disbursement will be forthcoming in the next few weeks.

Please let me know whether you accept this award by email (lcardello@clarku.edu) with SURE Program in the regard (RE:) line. Please also indicate the time frame in which you will be conducting your research, your Clark ID number, whether you are an international student, and whether you have any other summer stipend awards. If you require on-campus housing, you will need to arrange it yourself with the Residential Life and Housing Office.

We expect that you will participate in and present your research findings at Fall Clark Fest 2026 and hope to see you at Spring Clark Fest as well.

Congratulations and best wishes for an enjoyable and productive summer.

Deborah Robertson
Chair of Biology Department
